

Institute for Technology Assessment and Systems Analysis (ITAS)

Research area “Energy – resources, technologies, systems”

Research cluster:

Energetic and material use of biomass

Current projects:

Import of biomass and biogenic products to Germany

(2015 –) - [Project description](#)

State and prospects of overseas biomass transport to Germany

(2015 –) - [Project description](#)

Analysis and assessment of different carbonization processes for utilizing biogenic residues under technological and economic aspects

(2013 –) - [Project description](#)

Status: 12.02.2018
