

# Urban Transition Lab 131

## Participation on the way to R131

### CONCEPT OF ACTIVATING PARTICIPATION

The objective of activating participation is to enable participation at eye level, creating a transparent process in which all perspectives are equal. All views will be recognized and appreciated in this process, to enable joint decisions. Giving participants an opportunity to recognize the different viewpoints enables a learning process which in turn will lead to a more collaborative problem solving.

### TYPES OF PARTICIPATION

The process of participation of the project „District Future – Urban Lab“ is taken up, continued and thematically intensified in Urban Transition Lab 131.
